

**Working student**  
**Balancing energy market**  
**regulation**  
(m|w)  
Munich

We are working on boosting the “Energiewende”! We aggregate batteries from electric vehicles to powerful stationary storages. With these, we support the power grid in the balancing energy markets and offer an additional revenue stream to batteries and electric vehicles. Already today, we are operating the largest battery-pool from 2nd-life batteries in Germany.

In 2018 we are planning to expand to France and for this project we are seeking support from a native French speaker.

#### **YOUR TASKS AND LEARNING OPPORTUNITIES**

- Familiarization with French power market regulation with a strong focus on balancing power markets
- Identification of relevant requirements for the planned project
- Support in stakeholder management
- Support in technical concepts and design features of the battery storage system
- Support in presentations and reports for the planned project

#### **YOUR QUALIFICATIONS**

- Excellent French language skills (native speaker)
- Student at Master-level or equivalent
- Technical, legal or economic background
- Basic knowledge of energy economics and power markets

Together we are shaping the future of a sustainable power supply. Be part of our committed and engaging team with true Start-Up spirit. You will gain interesting insights into the dynamic changes in the energy and automotive industry. We can offer you flexible working hours at about 20 hours a week.

#### **APPLY NOW!**

If you are interested, please send us your application including a short CV, your study record as well as your availability to
